Simplified Hydroponics

Hydroponics is a method of growing plants without the use of soil.

The Institute of Simplified Hydroponics based in Bangalore, are the pioneers in Hydroponics/Soil-less Cultivation technology in India.

Started its operations in the year 2008 and have trained 100's of students in this technology from all over India till date.

This technology is very simple and can be learnt by anyone with basic education and even in certain cases by people with green thumbs but no formal certification.

Simplified Hydroponics is a highly sustainable, clean and green technology and is in practice in almost 22 countries around the world for the past 21 years. Visit our website for

more details.
